EXPERIENCE

Supply Chain Management Flipkart

May 2021 – August 2023, Hyderabad

My experience at Flipkart as a Supply Chain Management professional was a rewarding journey of growth and learning. Through my contributions, I actively contributed to Flipkart's position as a customer-centric e-commerce leader in the market. My passion for supply chain optimization and dedication to excellence enabled me to make significant strides in enhancing the company's supply chain operations.

PROJECTS

Parental Controls

CMR Technical Campus • October 2022 – October 2023

- Developed an app for parental support to track the Child's screen time and monitor the activity of the device
- Used Contextual analysis to analyze the context in which content appears to determine if it is inappropriate
- Implemented DNS filtering to filter the domains associated with explicit content to safe or blocked pages.

Wall of kindness

HackerEarth, IBC Media • May 2021 – August 2023

- Introduced the concept of a "Wall of Kindness" to facilitate helping those in need.
- Designed a user-friendly front-end for the website, enhancing the user experience for individuals seeking assistance.
- Collaborated with NGOs to source necessary items and resources for those in need.
- Ensured accessibility to users from diverse locations, making the platform available to a wide audience.

Bhraman

Smart India Hackathon • March 2021 – April 2023

- My experience as a Travel and Tourism App Developer was immensely rewarding. Building an app that addressed the challenges faced by travelers in areas with limited network connectivity was a fulfilling endeavor. Witnessing the positive impact of the app on users' travel experiences and knowing that it contributed to making their journeys safer and more enjoyable was truly gratifying.
